Psychology

**Master's thesis** presented to the Department of Psychology of the University of Basel for the degree of  
Master of Science in Psychology

# The Discrete Metric Under Time Pressure

Author: Seitz Florian

Immatriculation number: 14-051-791

Correspondence email: [florian.seitz@unibas.ch](mailto:florian.seitz@unibas.ch)

Examiner: Prof. Dr. Jörg Rieskamp

Supervisor: Dr. Jana Jarecki

Economic Psychology

Submission date: 15.10.2019

## Content

Abstract.....	2
Introduction .....	3
Theoretical Background: Categorization Under Time Pressure .....	4
Summary.....	7
Formal Models: The Generalized Context Model With Two Metrics .....	7
Categorization probability .....	8
Similarity.....	8
Distance .....	9
Minkowski metric.....	10
Discrete metric .....	10
Relation to the unidimensional generalized context model .....	11
Relation to prototype-based models model .....	12
Hypotheses .....	13
Methods.....	14
Optimal Experimental Design .....	14
Materials and Design .....	17
Participants .....	20
Procedure .....	21
Learning phase .....	23
Test phase .....	23
Results.....	25
Inferential Tests at the Aggregate Level.....	25
Cognitive Modeling .....	29
Model comparison at the aggregate level.....	31
Model comparison at the individual level .....	33
Summary.....	39
Explorative Analyses .....	40
Linear rule-based model .....	41
Discrete-threshold metric .....	44
Summary.....	47

Discussion .....	48
Implications for Theory and Research .....	49
Choice inconsistency with time pressure .....	49
The discrete metric without time pressure .....	51
Alternative Cognitive Processes: Rule-Based Decision-Making .....	51
Generalization to Unfamiliar Feature Values .....	53
Limitations .....	54
Conclusion .....	55
References .....	56
Appendix.....	63
General Instructions.....	63
Learning Phase Instructions .....	64
Test Phase Instructions .....	64

### **Declaration of scientific integrity**

The author hereby declares that he has read and fully adhered the [Code for Good Practice in Research of the University of Basel](#).
